Members of the United Nations Human Rights Council

United Nations Office at Geneva

CH-1211 Geneva 10

I am submitting this to the Committee on the Rights of Persons with Disabilities (CRPD).

Declaration: Ratified in Australia on 17 July 2008.

Please make sure that the events that are at the origin of the alleged violation occurred after the State party's recognition of the Committee's competence to receive individual communications (after the State's ratification of the relevant Optional Protocol or declaration), or that such violation continued beyond that date.

"Australia recognizes that persons with disability enjoy legal capacity on an equal basis with others in all aspects of life. Australia declares its understanding that the Convention allows for fully supported or substituted decision-making arrangements, which provide for decisions to be made on behalf of a person, only where such arrangements are necessary, as a last resort and subject to safeguards;

Australia recognizes that every person with disability has a right to respect for his or her physical and mental integrity on an equal basis with others. Australia further declares its understanding that the Convention allows for compulsory assistance or treatment of persons, including measures taken for the treatment of mental disability, where such treatment is necessary, as a last resort and subject to safeguards;

Australia recognizes the rights of persons with disability to liberty of movement, to freedom to choose their residence and to a nationality, on an equal basis with others. Australia further declares its understanding that the Convention does not create a right for a person to enter or remain in a country of which he or she is not a national, nor impact on Australia's health requirements for non-nationals seeking to enter or remain in Australia, where these requirements are based on legitimate, objective and reasonable criteria."

I, Dr Rich McLean, am the complainant and the victim and I have written this statement and provided evidence.

Interim or provisional measures may be adopted in urgent cases to request that the State in question adopt measures to prevent irreparable harm to the alleged victim while the case is still pending consideration by the Committee. "Irreparable harm" refers to a harm which, due to its nature, cannot be susceptible to reparation. The author requesting interim measures must demonstrate the risk is real and that, should it materialize, the damage would be irreparable. He/she must also demonstrate that the risk is personal (and not merely based on a general context).

I am applying for interim measures because I am being harmed in an irreparable way from which I may never recover.

I am without medicine, I am homeless, I cannot survive on a disability support pension, I have threats to kill me and my dog, No government agency will admit my former partner and I were ever together, meaning the coercive financial control he imposes on me is elongated and emboldened by the Government, My human rights are being abused in that I am victimised, oppressed, my finances redacted, no legal help, cannot go to police, am a failed whistleblower.

The risk is real. (Provide evidence).It is personal and not general because -

Subject: Urgent Request for Investigation into Human Rights Abuses and Threats to Health, Welfare, and Safety of Rich McLean

I, Dr. Richard McLean, am writing and speaking to you today to urgently seek your intervention and investigation into the severe human rights abuses and threats to my health, welfare, and safety that I am currently facing as an Australian citizen. My complaint pertains to a violation by a State Party, specifically the Australian Government, which has failed to fulfill its obligations under various international charters and agreements, mainly the Convention on the Rights of Persons with Disabilities (CRPD), as well as the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (CAT), and the International Covenant on Civil and Political Rights (ICCPR), but will be submitted under disabilities.

I am submitting this to the Committee on the Rights of Persons with Disabilities (CRPD).

List what Convention on the Rights of Persons with Disabilities (CRPD) it is in violation of that Australia has ratified from 2008.

3.

I am a former artist, advocate, author, academic but now a government scapegoat. I was diagnosed with schizophrenia when I was twenty and wrote a human rights awarded autobiography on it which was also awarded SANE Australia's 'Book of the year'. When it was published I was vilified by the herald sun, my former place of employment and Thi sonly within weeks later was pivotal me being unfairly dismissed from my job at The Age. With that publication I became well known especially because of my tireless advocacy for people affected by mental illness and their carers. I was unaware in hindsight that I was being exploited. I appeared in local state national even international audiences, in person, on TV and radio. A documentary was made on my life and art by The Dax collection. I am now fifty. I have also been diagnosed with ADHD, adjustment disorder, bipolar, and now suffer from an acquired brain injury, the result of a suicide attempt. The tragedy of the suicide attempts causation was not mental illness, but was in protest of and the result of being framed vilified victimised and having my prosperity politically and systemically maliciously intentionally redacted from me. I suspected I was involved in a conspiracy, after I was released from the hospital a FOI proved I was right. Evidence in a malpractice case was systemically silenced by government advisor and lawyer Russell Ball and the transcript of that evidence also silenced. I live in fear because I am a scapegoat and also fear litigation for having recordings of different people and situations or an even more direct political retribution such as being charged and jail, being framed with a crime I've been set up in, or incarceration again as a political prisoner to silence this statement.

Malpractice, my public profile and autobiography, and my former partner:

I record things because of the wide margin of error on my perceptions and I need to realty check. An unfortunate recording, not taken out of malice nor for extortion of a GPs malpractice was silenced by a powerful lawyer Russell Ball. He informs Government policy and advises the ombudsman, where I am a failed whistleblower. The evidence was silenced at HCC, MHCC, The Police, IBAC, The Victorian Inspectorate, AHPRA, NHPOPC and the Ombudsman.

At the same time I was seeking redress from other sources. My childhood sexualisation by various people including my neighbour Bob Martin was one. The Geelong VOCAT magistrate cited me as 'doomed to fail' I realised years later that's because I had been framed as an extortionist for having acquired the recording and was chasing money. Or at least that's what I thought. I also wanted redress from a former partner I was engaged to.

I had been in a live in same sex relationship with my former partner Stefan Iasonidis, and in hindsight he had exploited me. I was living off a total permanent disability payout after I became stressed in my role at north west area mental health service that was paid by my super fund. He was working as a consultant first at Apple under Steve Jobs then under David Irvine at ASIO the Australian secret service. I reluctantly lived off a disability support pension when I should have declared the relationship legally but he was earning upwards of \$30000 a month. After I was exploited and my money gone, he left me homeless without a fair equal equitable settlement, leaving me with his dying dog to look after. He was a sociopath, occasionally violent, greedy, menacingly intelligent, another child sexual abuse survivor, and controlling. He preached monogamy but in the end I found out he was doing the opposite putting my life and health at risk and this was just another methodology he utilised in order to control me as was the way he entrapped me by encouraging 'my independence' in encouraging my pension and so with exhausting my nest egg.

When I was finishing my PhD I began to try and reclaim some of the million in super he had and Telstra shares, and I was aware he had sold a home under my directions for over a million dollars. It was unverified he told me he put it in a tax haven. He admitted to being present at murders, and his dog was named after chopper Reid, an infamous villain whom he knew from when he dealt drugs.

The settlement never came and my community lawyer abandoned the case. In 2010 he had drugged me and violently sexually assaulted me although we persevered forgiving him at the time. I have not been able to report that to police even recently for fear of them actioning the mental health act and incarcerating me as they had done numerous times before. ASIO's David Irvine was aware I was being exploited because I found out he tried to make a carers pension claim for me which would exclude us being a couple but my parents still received that because I used to live with them and they still cared for me and it was red flagged and I was alerted my parents still received it.

From ASIO down, no Government agency has ever validated that the relationship existed. That includes the prime minister, the OPMC, AAT, AHRC, ASIO, AGIS who investigate ASIO refused to investigate, and the Ombudsman. He is enacting family violence upon me by coercive financial control, and the Government has his back. Systemically and politically the government by not acknowledging the relationship have elongated my financial abuse and emboldened my poverty, silenced a well known fact, which ended up forcing my bankruptcy in 2021.

At one stage Footscray police, who knew I had been together with him and for whom his name would flag a protection consciously knew I was being systemically and politically robbed and that it was affecting my mental health Rather than acknowledge the whole picture threatened me with the mental health act and literally forced my dog and I into my car and away from my home, which was then a squat because I could not afford rent. On one occasion I was hiding in a hostel and I received a message via a gay dating app that

he had been done for embezzlement of a million dollars and that he wants my husky dead. To legitimise the message the police need to tell me if the embezzlement happened but it makes sense because of his corrupt investments and his new ABN made at the end of our relationship. This was a direct threat to killjoy dog. He had already exploited me made me homeless threatened me and somehow not one friend acknowledged the relationship or sided with me in the break up. He was and is enacting threats to kill and coercive financial control and the police and government were on side. Now that I literally cannot report being drugged and raped by him to police for reason of the police incarcerating me if I show up at a station and the police already aware who he is and what he did I have to conclude that this man is a reason behind my situation. He was the reason of my financial persecution and one of the original genesis points of my detriment. Its no surprise just before I was incarcerated the first time I had attempted a settlement with his superannuation and I have evidence of his malice threatening to report me to the NDIA if I did not come up with evidence about the murders I threatened to whistleblow on.

The prime minister recently refused to acknowledge the relationship, instead referring me to mark Dreyfus the attorney general and his office had again referred me to AGIS (who already knew), and the ombudsman, (who had already rejected my PID and had stated they refused all further correspondence). The key issue of that conciliation seemed to have blacked out every other issue I had and in a systemic and politicised way I had been seemingly consciously maliciously and intentionally redacted any prosperity that was coming to me. The things I did have that made me money were taken from me such as the destruction of my website that was all my abn by micron 21, the cancellation of my contract with the ndis quality and safeguards commission, the continued rejection from any or all lawyers, being banned at AFCA causing over a million dollars in detriment, and the AHRC refusing to investigate my documented human rights abuses, victimisation and oppression.

Additionally my workers compensation insurance was shepherded by work safe to ComCare. There Paul Fowler rejected it on account of I am not an employee for the purposes of the SRC act. Paul Fowler was the old boss at Comcare and Russell Ball worked with Worksafe. I appealed ComCares rejection and it went to the AAT but in this time I had attempted suicide in the meantime and been revived from certain death by being found by accident unresponsive and with no observable pulse. I had refused to go through with the AAT hearing because I knew it was imbalanced and not fair because the government had high profile lawyer Kate Watson, and I had no lawyer. I begged the ombudsman to stop it but they didn't and I asked the attorney general to stop it but his office said he would not intervene. I claimed it went against my human rights as a disabled person for being locked out of the law systemically and utterly when every government department I had ever corresponded with had access to legal team. Looking back none of my decisions at institutions organisations or state or federal government agencies were ever fair unbiased not corrupt already not already pre determined and they were also illegal.

Previously I had written to micaelia cash the former attorney general about my issues with AHRC and AFCA and I rightly predicted that due to this my Comcare has had failed and so would the AAT. She didn't intervene and sent me to Lifeline. I was exposing systemic corruption but it fell on deaf ears. I was not surprised when member Purnell was favourable to Kate Watsons defence of the government to not pay my Workcover. I appealed at the AAT saying that the decision was unfair and illegal because a disabled person is supposed to have access to the law and equality before it however they still upheld it and the decision looking back was clearly pre determined and corrupt.

I had also missed out on my income assist from HCF. They had said my illness was pre existing despite concrete evidence from my dr that schizophrenia was never an issue when I went to visit my GP. The discharge summary from that first hospitalisation said I was neither delusional nor psychotic so schizophrenia was not the issue. I fought it for a long time and now they have got a staff member tout an AVO on me whom I have never heard their name nor met and if I do so much as call them I could be arrested. It is a desperate way to try and silence me and cover their tracks of the conspiracy to pervert the course of justice.

There is now a cover up of the suicide attempt tragedy whereby the weribee mercy hospital owed me a duty of care. This is a new layer added to my detriment in a systemic and political way up to and including the ombudsman. Redress has never occurred for the brain detriment I now have. Salt water clinic is the community mental health facility that at first disengaged me due to an 'impasse' but were then re engaged for year after and force medicated me for 'ingrained delusions of persecution' which were in fact real events that they were consciously aware of. This way of force injecting me with anti psychotics was off and on for years and caused meta hallucinate. It was immoral unethical and it was malpractice.

Micron 21

My dexamphetamine script dr David Horgan

The present

Right now, I am officially homeless. I don't have enough food or medicine, I have been rejected mental health care, I have neither a psychiatrist nor psychologist and I am in very temporary accomodation the guest of charity. I have been robbed systemically and politically and set up to fail. A conspiracy to pervert the course of justice that victimises me has and is occurring.

I am a failed whistleblower, cannot go to police, cannot get and never had legal help.

I have diligently pursued domestic remedies to address these violations, engaging with numerous government agencies, departments, and authorities, including the highest levels of government, such as the Prime Minister himself.

Despite these extensive efforts, over years, a satisfactory solution has not been found. The exhaustive list of agencies and authorities I have interacted with demonstrates the comprehensive pursuit of domestic remedies in my case, all to no avail. Every time I engage somewhere, the decision to act in a way which de legitimises my claims and redact my prosperity has already been made and my answers are pre determined in order to suit the malicious and corrupt plan to harm me by redacting my prosperity.

I don't know what is happening to me but at one point I felt like they were trying to kill me, so I launched www.killhim.info where I protested. I am hesitant to say that this movement seems to be systemic and malicious and has an obvious method of robbing me or redacting my prosperity and this oppression is one of the reasons I protested in a suicide attempt in feb 21, after I was vilified for mental illness and incarcerated. I tried to protest the tragedy again at HCC,MHCC, MHLC, The Police, IBAC, and even though the tragedy was committed with an agreed illegal contraband, and the hospital owed me a duty of care, and that I had never worked again, and that I had undiagnosed PTSD from bleeding out, that the ombudsman ben calder did not investigate it and the case was closed. Obviously to rob me is a threat to my suicidality. The ay I was then refused service, robbed of money, conspired against, have my prosperity redacted, that I was reincarcerated multiple times and that retraumatised me, that Weribee mercy hospital and the police oversaw hung ho my landlord go to my home whilst was incarcerated and take my possessions to the rubbish tip, that a settlement with former partner was elusive, that AFCA delayed denied deferred my financial determinations despite their own policy that said 6 weeks for financially marginalised person, that the AHRC rejected my pleas, and also free kicked an over one million dollar settlement to the opposition in a way which was not at all impartial, the way HCF then banned me from all contact, that my business website was destroyed by government backed micron21, that my PLR and ELR royalty payments suddenly dropped off,

It seems as if they were indeed, at the least make my live an intelligently designed poverty, and that this intelligent design of my finances was malicious and intentional and systemic

and politicised, but this movement was trying to cause me harm and impart maximum damage.

At the time I was hearing voices in accusatory tones in my room screaming 'you're not schizophrenic' and 'rapist' and 'pedo' and 'faggot' and these noises were inside my home. Another day I had to convince a criminal who had broken through my garage and into my house to leave the house, other people were gang stalking my home. The police regularly visited for welfare checks after they consciously were aware of how my former partner and his exploitation of me and the cover up was never acknowledged. They were watching and all the authorities were watching an intentional deconstruction of my finances and life. At one point I had casual sex with someone high up investigating the ndis and I also recorded it because he mentioned he might have killed people. What was revealed was a man high up in government who was a returned SAS soldier and he detailed how the government would sacrifice me - terminate me - kill me - before admitting liability of the intentional menace of many public officials.

At the time I was confronted with investigators outside of my house, eyeballing me off and I was under surveillance. I recorded them one day. Another person alluded to the GP John Whitaker and mentioned the www.killhim.info website and said that one day we will get you. On chat apps people in my neighbourhood warned me people were watching. My wife was renamed to 'secret hospital records' as I was getting my FOI. Files disappeared, and were moved to the trash without my doing it. Passwords were changed especially those to do with my website at micron21. People who were left in my life were not authentic friends, and often they came to collect information or check upon me or either harass or intimidate me.

My reality was already uncertain and my perceptions always had a wide margin of error. But now with a conspiracy to pervert the course of justice in full swing I was beginning to find it hard to know what was real and what was unreal. This is a reason I had always recorded things in my life and a reason I recorded my GP who I had told I was suicidal many times but was not getting the help I needed.

List them:

My situation has reached a critical juncture, and I consider it an emergency disclosure for Public Interest Disclosure (PID) purposes due to the imminent threats to my life, well-being, and safety. I have experienced severe human rights violations, constant surveillance, and threats to my safety. Furthermore, I have exhausted all avenues for redress within the Australian government. My multiple PIDs have been systematically rejected, and even when referred to higher authorities, such as the Attorney General's Office and ASIS, the response has been inadequate. The Commonwealth Ombudsman also rejected my PID and refused further correspondence.

There is now

The charter of human rights of a person with a disability australia has ratified says I must be provided reasonable accomodation and although there is enough to pay for it in my NDIS plan the money is locked up and not been allocated.

The office of prime minister and cabinet at first say my FOI was voluminous and complex but now say in clear defiance and with poorly veiled deception that no documents exist. This would be highly unlikely.

My former partner Stefan Iasonidis worked for ASIO the Australian secret service. In hindsight, he exploited me and left me homeless. The boss then of ASIO david Irvine confined the exploitation because he knew I reluctantly accepted a disability pension when my partner was on \$40000 a month.

He owed me a legal and fair equitable settlement but this has never happened. In fact no government agency will even admit the relationship ever occurred.

He drugged and raped me but I cannot report this to police, for fear they will incarcerate me again under the mental health act..

I have lost insurances, business insurance, life insurance, work cover insurance, income assist insurance, malpractice settlements, settlement with former partner, settlement with hospital, conciliation at AHRC, my VOCAT case regarding child sexual abuse, my other VOCAT case where I was hospitalised with broken bones and lacerations in a violent affect in which I helped a member of the public, my institutional child sexual abuse redress.

The things I did have are gone. My business, my accreditation to work, my business website www.richmclean.com.au, my home, all the things I owned in my home were taken to the tip, my art is gone, my photos, my documents, my reputation is ruined, as collateral damage for being a scapegoat my family don't talk to me and my friends are gone.

A powerful and influential lawyer opposed me in 2017 mr russell ball. He is a man who informs government policy and advises the ombudsman. I am a failed whistleblower at the ombudsman and they refuse all communication with me. He silenced a recording of evidence and the transcription of that evidence at HCC, MHCC, the police, IBAC, the Victorian inspectorate, Ahpra, NHPOPC, and the ombudsman. It was only after surviving my suicide attempt I discovered he did talks at Ahpra informed the ombudsman and worked also with work cover.

I was hospitalised for my “paranoia” but after the first admission in which I was revived from certain death dr lagrasso in his discharge summary stated I was neither delusional nor psychotic, and labelled me with adjustment disorder.

The gravity of my situation and the complete breakdown of domestic remedies underscore the urgent need for international intervention to protect my rights, safety, and well-being. I kindly request the United Nations Human Rights Council to launch an immediate investigation into the human rights abuses I have suffered, ensuring a comprehensive review of all aspects of my case, including the conspiracy to pervert the course of justice, threats to my life, surveillance, and the complicity of government agencies and officials.

I am currently facing dire circumstances, as I am officially classified as homeless and struggling to meet even the most basic needs. Access to essential medication, including prescriptions that have been crucial to my well-being in the past, is beyond my reach. Moreover, I am unable to report any criminal activity to the police, including instances of systemic corruption, due to the complex challenges I am grappling with.

Throughout my fifty years, I have never had the opportunity to benefit from the guidance of an impartial and unbiased lawyer. My attempts to make Public Interest Disclosures (PIDs) to various agencies have all ended in rejection, despite my eligibility and legitimate reasons for seeking to make such disclosures.

These profound and interconnected issues emphasize the urgency of my situation and the critical need for comprehensive intervention to protect my rights, safety, and well-being.

My former partner, Stefan Iasonidis, with whom I was engaged for five years, systematically exploited me and has yet to provide a fair, equal, and equitable settlement. Despite compelling and concrete evidence confirming the existence of our relationship, government agencies consistently deny it, further exacerbating my vulnerability.

In hindsight, it is clear that I was systematically exploited during the course of the relationship. At its conclusion, I found myself homeless and devoid of any prosperity. My

total permanent disability payout, which was intended to secure my future, was depleted in an effort to keep pace with my former partner's substantial income, despite my reliance on a disability pension.

Moreover, I experienced a traumatic incident in 2010 when my former partner, Steve Iasonidis, drugged and assaulted me, accompanied by threats of harm if I disclosed the incident. My recent attempt to report this heinous crime to the police was met with redirection to the police station, a move that I fear could result in my involuntary commitment under the Mental Health Act, as authorities have done multiple times in the past. This situation highlights a pattern of systemic disregard for my victimization and financial suffering while stigmatizing me for my mental health challenges.

I want to emphasize that my poverty is not a reflection of my character or personal weaknesses. It's a consequence of a deliberate and politically motivated systemic process. To add to my difficulties, my former partner was implicated in a million-dollar embezzlement scheme exposed by a whistleblower. Now, he has resorted to threatening not only my life but also the life of my beloved dog. This level of coercion and intimidation constitutes family violence, and it's completely unacceptable, especially when it includes threats of harm.

I find myself trapped in coercive financial control by my former partner, who seems to enjoy support from the entire government. Authorities refuse to acknowledge our relationship's existence or investigate allegations of corruption and unethical behavior, even though my former partner holds a public office position at ASIO.

I'm urging the UN to intervene in my situation and address these severe human rights abuses. It's crucial to ensure that I am protected from further harm, both from my former partner and the government agencies that have neglected their duty to safeguard my well-being and rights.

I must emphasize the critical breakdown in the Australian government's ability to address my human rights abuses. I am a 50-year-old individual with disabilities and diagnoses, including schizophrenia, ADHD, an adjustment disorder, and a cognitive brain impairment, and I have never had legal representation. I find myself unable to report grave offenses, including being drugged and raped, let alone systemic corruption.

Even in cases where my Public Interest Disclosures (PIDs) were rejected, there was one instance from the Federal Court that acknowledged an imminent threat to my immediate harm and welfare. Given the severity of my situation, I implore the United Nations to immediately acknowledge and intervene in my human rights abuses to ensure my safety, protection, and justice.

I have been a victim of a conspiracy to pervert the course of justice, resulting in prolonged oppression and victimization. This systematic campaign against me has already driven me to attempt suicide nearly three years ago. The malicious redaction of my prosperity and the callous disregard for my well-being by various agencies, including the police, politicians, and public officials, have further exacerbated my suffering.

The threats to my life are not to be taken lightly. I have been subjected to death threats and am under surveillance by government agencies, for which I possess substantial evidence. These threats and surveillance have left me in a state of constant fear and insecurity.

What adds an alarming layer of significance to this case is the involvement of high-ranking officials and agencies on both federal and state levels within Australia. Among those ensnared in this matter are the Prime Minister of Australia, the Attorney General's Office, and a multitude of statutory agencies, including ASIO, AGIS, ComCare, the AAT, AHRC, AFCA, and many others. The implications of these allegations are profoundly troubling and raise serious concerns about the integrity of Australia's government and its commitment to upholding human rights.

My situation is characterized by a series of egregious injustices and systemic failures that have left me in an exceptionally vulnerable position. Despite my entitlement, my income assist insurance from HCF and work cover insurances from work safe, Comcare, and upheld at the AAT have never been paid. In hindsight these decisions were pre determined never impartial or fair or legal and violated conventions Australia has ratified. Additionally, my business, www.richmclean.com, was deliberately destroyed, exacerbating my already dire financial hardships.

The gravity of these systemic failures and the involvement of high-level government officials underscore the immediate need for intervention and the recognition of my human rights abuses.

Furthermore, I want to bring to your attention additional instances of human rights abuses that I have documented. I reported human rights abuses involving an NDIS worker, but my NDIS company has refused to sign off on these reports, effectively obstructing any proper investigation and resolution. Regrettably, the AHRC, an organization with a mandate to investigate such abuses, has failed to take any meaningful action in response to my documented reports.

My experience at AFCA has been equally distressing. My financial determinations were repeatedly delayed, denied, and deferred, ultimately leading to a ban from all contact with the organization, despite my having a clean criminal record and being a member of a democratic society who should have access to facilities and redress.

Moreover, my experience at the AHRC took a heavy toll on me both financially and emotionally. I lost over a million dollars when a decision that was supposed to be impartial appeared to be biased in favor of the opposition, which in this case was my superannuation company that had denied me insurance.

Additionally, a malpractice case remains unresolved due to the suppression of legitimate evidence by a powerful lawyer with government ties. These events raise profound concerns about transparency and fairness in the legal process.

My journey as a whistleblower has been fraught with rejection and indifference, even from government agencies. My attempts to seek political intervention have frequently been redirected or simply ignored. The recurring failures in my cases, characterized by predetermined outcomes that defy the principles of human rights and disability law, emphasize the urgent need for intervention and recognition of my human rights abuses.

My harrowing ordeal extends far beyond the legal and financial aspects. The consequences of prolonged financial abuse have driven me to the brink of bankruptcy and even to a tragic suicide attempt inside Werribee Mercy Hospital. Although this attempt was deemed fatally the hospital FOI yet I was accidentally discovered and I miraculously survived after losing consciousness, having bled out and being found with no observable pulse. There is now a whitewashing of the entire tragedy up until the ombudsman and I suffer a cognitive brain impairment which I notice daily as it affects my memory. The hospital owed me a duty of care and they dealt me the tort of negligence.

I have faced incarceration multiple times, primarily due to my status as a political prisoner rather than any mental health issues. During one of my imprisonments, authorities allowed my landlord, Hunt Ho, to dispose of all my belongings, leaving me with nothing. I had been rendered a vagrant and dumped in a homeless shelter with only the clothes on my back. The health care team would then sidle up with me and force inject me for madness that was real to the exclusion of any and all other factors in my life and excused themselves of any liability for my situation and they wondered why I am suspicious of the broken mental health system. As a scapegoat they are the only people obliged to have traction with you not because they care but because they are paid and they always then see you with mental illness goggles on. You are mad. They are not. They control the chemicals they put in your body and never listen that you are the expert in your own care.

The destruction of my website, which served as a crucial source of income and organization for my business, has been a brutal form of persecution.

Furthermore, I have endured violence, including a broken nose, during an attack within a hospital. Shockingly, I was blamed for this incident rather than receiving any form of redress. On another occasion, I intervened in a violent affray to protect a member of the

public but ended up hospitalized with broken bones and lacerations. When I sought help from victims of crime services, I was wrongly portrayed as the principal aggressor, despite video evidence clearly showing otherwise. To add to the injustice, my Freedom of Information (FOI) request from the police revealed false associations with crimes in states I had never even visited.

Rich's quest for acknowledgment and support for historical child sexual abuse and sexualization suffered as a child has been met with dismissal. The magistrate even referred to his case as "doomed to fail," which left Rich feeling neglected and unheard. It appears that his situation may have been manipulated by others, as he was falsely labeled an extortionist for possessing a recording of malpractice. This recording was not intended for malicious purposes but rather as a way for Rich to validate his own reality, given the uncertainty he experiences due to his schizophrenia.

Following one of my incarcerations, I was placed on a treatment order and subjected to forced injections of antipsychotic medications. This was supposedly due to alleged "ingrained persecutory delusions." However, it is crucial to highlight that these supposed delusions were firmly rooted in factual events and experiences.

Remarkably, Dr. Michael Lagrasso, in his discharge summary from the hospital following my suicide attempt, made a significant assessment. He noted that I was neither psychotic nor delusional and instead diagnosed me with an adjustment disorder. This diagnosis serves to validate the real and legitimate nature of the abuse I have endured, underscoring that my experiences were not delusional but rather a response to the very real challenges I have faced.

Dr. Lagrasso's diagnosis underscores the importance of recognizing the veracity of my claims and the urgent need for intervention and justice in my case.

My life has been significantly destabilized by the denial of my ADHD medication, placing me at risk of resorting to self-medication. Over the span of ten years while I was on this medication, I achieved significant milestones, including completing a master's degree, authoring and illustrating a children's book, fundraising for the Royal Children's Hospital, and providing crucial support to marginalized students. I was even honored with a scholarship for a Ph.D., which I successfully completed in 2020. During this time, I managed my own website and established a business as an artist life coach, securing a government contract with the NDIS. I also dedicated my efforts to caring for marginalized individuals in my community.

However, my life took a devastating turn when I was hospitalized, primarily due to the manipulation of my former partners, who orchestrated my institutionalization. This occurred after I threatened to expose their involvement in murders and money laundering in a tax

haven. It was during this period that I experienced my suicide attempt, and my ADHD medication was abruptly discontinued.

This abrupt cessation of my medication has had profound and detrimental effects on my life and well-being, further underscoring the urgent need for intervention and acknowledgment of the injustices I have faced.

Dr. David Horgan is the only medical professional authorized to prescribe the class A drug required for my ADHD treatment. However, Dr. Horgan has refused all contact, raising serious concerns of medical malpractice and a lack of appropriate medical care.

The denial of my essential medication not only jeopardizes my well-being but also hinders my ability to function effectively, pursue my livelihood, and contribute positively to society. This aspect of my story further emphasizes the urgency of addressing my situation comprehensively and ensuring my human rights are protected.

My story is one of profound suffering and injustice, and it underscores the urgent need for intervention and the protection of my human rights.

I kindly request that the United Nations Human Rights Council launch an immediate investigation into the human rights abuses I have suffered. This investigation should encompass all aspects of my case, including the conspiracy to pervert the course of justice, threats to my life, surveillance, and the complicity of government agencies and officials.

Time is of the essence in this matter, as my life is in immediate danger. Your intervention can make a significant difference in ensuring my safety, securing justice, and upholding the fundamental principles of human rights.

I eagerly await your prompt response and action on this matter. The international community looks to the United Nations Human Rights Council to protect the rights and well-being of individuals like me who face grave injustices.

Every day I wake up and assess my homelessness and poverty and every day lived like this is another day that family violence and coercive financial control has won and further that it is elongated and emboldened by the federal government.

Every day I endure more financial destruction via never having access to the law or equality before the law to gain my various redresses, compensations, insurances, or settlements is another day that my human rights as a person with a disability has been smashed by a convention australia has ratified yet never followed through on.

In hindsight and proven with evidence is the fact that my decisions and determinations that have been decided by government departments have never been fair or impartial and looking back have had pre determined outcomes corrupted by people like powerful lawyer Russell Ball . My evidence demonstrates he silenced legitimate evidence and even the transcript of that evidence at many agencies up to and including the ombudsman of whom he advises and also where I have a rejected PID disclosure and my correspondence is now refused.

Every day I wake up and I am not safe from this persecution and the death threats to my dog and I from my former partner who admitted to me he has been present at other murders. I never feel safe or secure and because I have filmed investigators at my old footscray squat surveilling my home I cannot be sure that I am being followed or harassed.

Every day my civil liberties have been eroded and it cannot be expected that with this type of systemic and political persecution and the malicious redaction of all my prosperity that it is possible to enjoy any freedom or leisure time, especially with no money and saturated with worry for where I can have a place to simply exist with a roof over my head.

Every day I mourn the loss of my family and friends who by and large have all witnessed me coming undone but either didn't want to or couldn't intervene in a meaningful way. I feel anger for people because they have rejected me and I've been begging for help. They all know I've been struggling and many are in positions of privilege and money with houses jobs and cars and still not just ignore me but wilfully pointedly neglect me and for this I struggle to settle in me or find peace because I know that they too maliciously mean me harm.

All of these people welcomed my former partner in their lives when we were together and even though I may have upset people that they hang onto how I've upset them and forfeit the larger picture of a victimisation they possibly cannot ever comprehend. It astounds me how many friends and acquaintances I had when we were together who have now universally neglected me refused calls or never spoke to me again and I wonder of the spaces between spaces or the implied inference with how powerful people have affected the public and my peoples perception of me. I wonder if this could have been a battle I could have ever possibly won.

Now that this has failed systemically in the Australian political landscape I feel uncomfortable about appealing to the UN but in fact I have no choice on it if I want to live a life that has a resemblance of anything that is meaningful with enough food medicine and provisions. My PIS are rejected despite evidence I am able to make a disclosure, and I wonder of my future if the UN fails to intervene or how I will move forward having lost all traction systemically in a society that I served helping others for over thirty years.

I am rationally paranoid that my intuition and my fear of literally being abused and victimised and forsaken to utter and absolute desperation that I suicide. If I do that mental illness will be blamed exonerating all public officials politicians layers family and friends of any liability will come to pass and its impossible to try and stop the narrative. I fantasise that I am in an alternate gang stalking reality and that my rebirth is fated to die only to evolve to have a legacy in which my struggles would be legitimised in the knowledge my death would be investigated by a coroner and the judgemental sin of people and individuals finally acknowledged.

But I want to live and I want to enjoy the sun and plants people and my beloved dog crystal. Many people would not believe it but I actually love all people and forgive all my oppressors but that does not negate being paid or compensated in a way that would still not cause them physical harm the way they have collectively enacted harm to me.

In conclusion, the compelling evidence I've shared in this letter underscores the urgent need for immediate action from the United Nations Human Rights Council. My journey has been marked by severe human rights abuses, systemic neglect, and constant threats to my life and well-being, and I cannot bear this burden alone any longer.

The systemic failures within the Australian government, the involvement of high-ranking officials and agencies, the denial of my essential medication, the exploitation and victimization by my former partner, and the consistent rejection of my Public Interest Disclosures all point to a grave injustice that demands international intervention.

I respectfully call upon the United Nations Human Rights Council to launch an immediate and thorough investigation into the human rights abuses I've endured. The evidence I've presented here, along with the urgency of the situation, leaves no room for hesitation. Acknowledging my plea and initiating an investigation is not only a moral imperative but a legal duty to protect human rights and uphold justice.

I express my deepest gratitude for considering my plea and taking the time to read this letter. I eagerly anticipate an immediate acknowledgment of the pressing nature of my case and further confirmation of the investigation. To do otherwise would, in essence, be aiding and abetting a disaster that threatens my life and well-being, and the rights I hold dear.

When I win, I promise everyone will win.

Sincerely,

Barran dodger
